

Bike Scheme

Get a great new bike to cycle to work for less than £1.50 per week

The Salary Extras Bike scheme allows you to save up to 42% on the cost of a bike and safety accessories for the purpose of cycling to work.

There's nothing to pay up front and because you're paying for it directly from your salary, it helps to make the bike more affordable by spreading the cost.

The scheme is run in conjunction with Halfords so you can access a great range of bikes through their stores or through Halfords independent retailer network partner.

Here's how you benefit:

- Make great savings in tax and National Insurance. (Standard rate tax payers save 32% and higher rate tax payers save 42%)
- The cost of the bike is spread making it more affordable
- A calculator tool is available so you can check out the total cost before you place an order
- Save money on fuel and parking costs and get fit
- Access to over 460 stores throughout the UK and an extensive range of bikes to suit all tastes and budgets
- The support of a dedicated customer service helpdesk.

Get fit, go green and save money!

You can also take advantage of a number of other benefits too including:

- Free Family Cycling Voucher - 20% off Apollo Bikes
- £10 off all bike carriers
- 10% off bike storage, cleaning kits and all tool and maintenance kits.

So now you could leave the car at home, save yourself a lot of money and get fit at the same time!
